---

**Agreement with Simcoe Plastics / Coverage extended into Canada**

Newly established distributor **General Polymers Thermoplastic Materials** (GP Materials, Clarkston, Michigan / USA; [www.gp-materials.com](http://www.gp-materials.com)) is expanding its coverage in Canada after signing a cooperative agreement with **Simcoe Plastics** (Shanty Bay, Ontario / Canada; [www.simcoeplastics.com](http://www.simcoeplastics.com)).

“Our supply partners are excited about the focused approach on their product lines and rapid expansion of commercial coverage in North America,” said *Gregory Boston*, partner in GP Materials.

*Kurt Stahle*, president of Simcoe Plastics, said representing GP Materials gives it the opportunity to bring a consistent supply of prime resin offerings to automotive and premium custom applications.

GP Materials was established on 15 October by Gregory Boston and *Michael Kirtley*, both US plastics industry veterans (see PIEWeb of [28.11.2016](#)).
